

1. Review project background doc

- companies are clients
- acceptance criteria:
 - info about company, GDPR, info about types of jewelry
 - * GDPR for international expansion?
 - An (complete?) order generates invoice & work order
 - customer specifies jewelry details for each piece
 - * and for large orders, is it manual for each piece?
 - important to minimize time to reach people
 - contact page (and admin page to manage?)
 - built to manage addition of lines beyond MVP (in 12 months, so maybe a CMS?)
 - says this is a "nice to have" but not a requirement
 - different payment options
 - * what is current option?
 - prices listed without VAT
 - * is this allowed internationally?
 - what is the missing bullet point under engraving price

2. Explore - timebox: 30 min

- Contact page

- complaint: order date says "if applicable" but doesn't state when it is applicable.

- * make it mandatory for the two "dissatisfied" options

- terms of delivery help link redirects to about us page

doesn't show required field

- FAQ page

- Engraving explanation is very confusing with multiple footnotes
- Returns say "contact Kunde" but doesn't redirect to contact page or explain How

- Ordering

- Every sku only counts once per item, even on 100 items
- Allows emojis in text
- What is "Premium engraving charge" and why is it a discount?
- Between shop page and checkout page, total changes by 10 SEK until refresh shows correct price
- 10% discount shows more than 3 items, when FAQ states more than 4 items
 - * requirements state "three or more", so both are wrong
- Small shows as "extra small" on order
- premium engraving on twin towers is 100 SEK for 2 lines on S

- Checkout

- entered real email address, but didn't receive an invoice
- no order #
- allows 6027 in year
- Checkout doesn't empty cart until navigating from the confirmation page
